

New products information

To the top of projection screen brand! OS group release
OS SCREEN brand with the new fixed frame and electric type.

New electric projection screen is never bothered you with motor noise.

OS+e (HQ: Tokyo, CEO: Masayuki Okumura) is going to release OS SCREEN brand revival in Japan. OSI (global market), and OSC (Mainland China market) are also going to provide new 3 type of projection screen for international customers as OS SCREEN brand revival, which are the fixed frame, tab tension and electric projection screen.

OS SCREEN brand is a proof of the highest quality products offered by OS group, which provide you the most beautiful image. OSM CO., LTD. who is our mother factory, is responsible for planning, design, and manufacturing. OS SCREEN brand is completely made-in-Japan products.

Today, 20th May, we are pleased to announce the release for new products based on our technology and research we have developed over the 66 years as a projection screen manufacturer.

We have lined up four type of screen materials, including REIRODORU(HF102), Pure Mat III Cinema(WF302), Pure Mat 204(WF204), and WF-Pro(WF801).

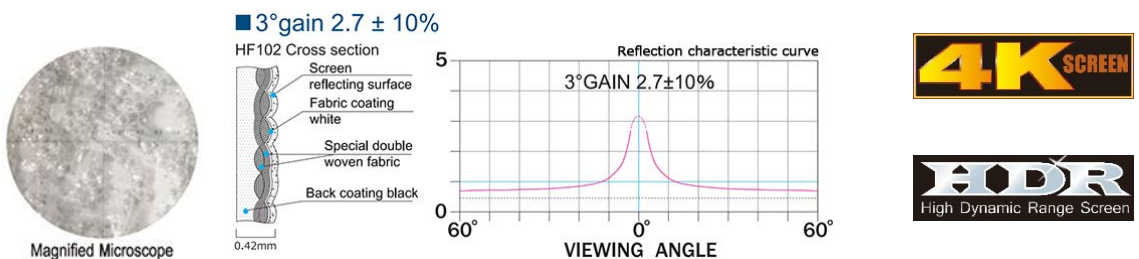

Standard image size is provided each 10 inch from 80 inch to 140 inch, and the custom-made size is accepted.

TP and EP series, which is new type projection screen with noise suppression mechanism, are quieter than current model STP and SEP series.

The characteristics of screen materials

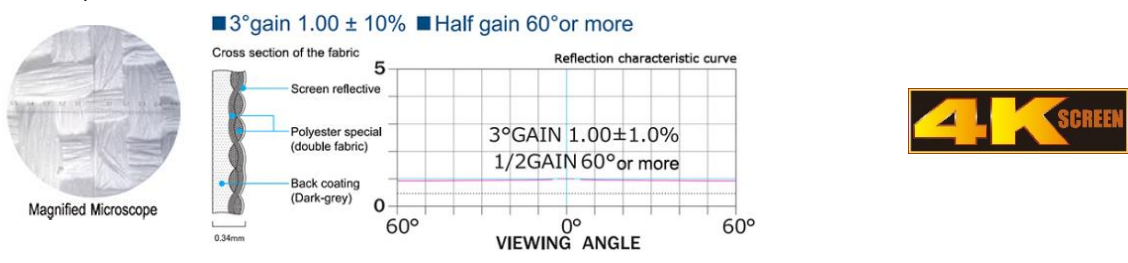

□REIRODORU (HF102)

REIRODORU is achieved 2.7 high gain by special surface coating on the diffusive type fabric in order to create the clear contrast of HDR. This is our flagship model of OS SCREEN with the fourth reflection characteristics, which is combined diffusive, retroreflective, and reflective type and reduced hot spots.

□Pure Mat III Cinema (WF302)

Pure Mat III Cinema(WF302) is realized one of our ideal fabric screen, which has our concept “No increase, No decrease”, and is suitable for 4K. This fabric creates the finer and purer image by elaborate weave with the half thickness yarn than previous model.

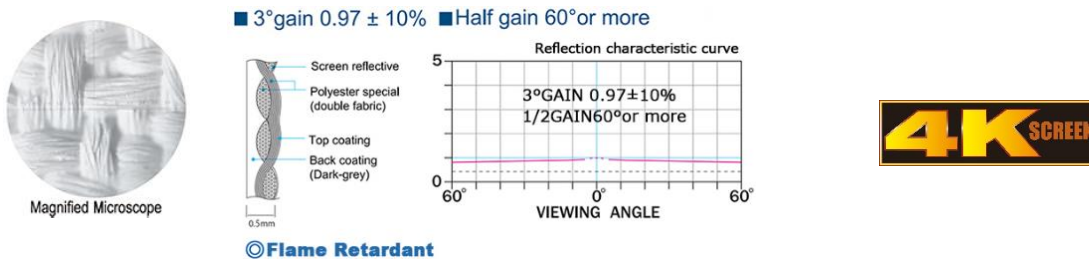

□ Pure Mat 204 (WF204)

Pure Mat 204 (WF204) is the latest model of the long-term selling WF200 series. This fabric has made by combining with two different weaves, which is our unique technology to make random structure. Pure Mat 204 is the standard screen with comfortable image for Full HD.

□ WF-Pro (WF801)

WF-Pro (WF801) has the flame retardancy and PVC free in addition to compatibility with the 4K high quality resolution. These features must have been needed to install the public space in Japan such as hospitals, shopping malls, and school buildings. WF-Pro (WF801) is the best screen surface for the public facilities.

The characteristics of screen

■ PX (Fixed frame projection screen)

PX is the flattest and ideal projection screen by stretching springs from all sides. New fixed frame screen is lighter than the previous model and improving workability by using new corner joint parts. It is suit for short throw and ultra short throw projector, which is getting famous. This is an ideal screen that is less susceptible to ambient factors such as changes in humidity. The frame is flocked for a luxurious feel.
