

## GENERAL CATALOG

### Safety Measures

To ensure the product is used safely, please carefully read both the manual and the following safety precautions.

#### Flame retardancy

The flame retardant products described here are products that meet the flame retardancy performance standards applicable in Japan.

The test standards for the performance of flame retardancy differ in the each country, so please check the standards of your country of use.

#### Safety precautions and other important notes

- The screen may fall off when the ceiling or the wall used to hold the screen is not strong enough, and therefore users are to ensure the wall or ceiling (especially in case of plaster or wood-board etc) is adequately strengthened before setting the screen.
- An improper fixing or electrical work may lead to electricity leakage or even fire. Therefore users are highly recommended to appoint our short-listed contractors.
- The surface of the screen is specially processed to enhance the screening effect, and any dirt or damage to the screen could worsen the quality. Hence users shall observe the following measures.
  - (i) Do not touch the screen surface with bare hands.
  - (ii) Do not write directly on the screen.
  - (iii) Do not scrub the screen surface with any hard objects.
  - (iv) Only soft brush or dry cloth shall be used to wipe off the dust from the screen. Never use a wet cloth nor any chemicals to clean the screen surface.
  - (v) Bring the screen in setting on proper level, watching from the case edge-otherwise some lines or V-shape wrinkles shall be brought the screen fabric.
- The screen fabric may slightly expand or shrink subject to the room temperature or humidity.
- When using the models with Infrared remote control, the receptors shall not be placed closed to other fluorescent lamp or device to avoid any false signal.
