

4K Screen Ultra Beads BU301

A Solidity You Would Feel It.

A Moment of Intoxication With Images That You Keep Watching.

NEW

4K Screen Ultra Beads BU301

AKIREI

Overwhelming color expressiveness that reflects the superb images in your living room.

The Superb Screen That Fully Projects a Sharp Beauty Image in Your Living Room.

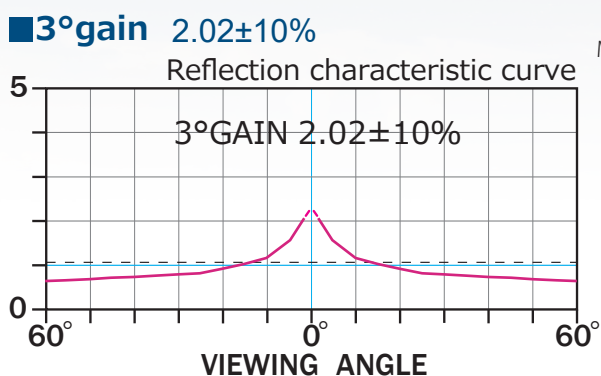

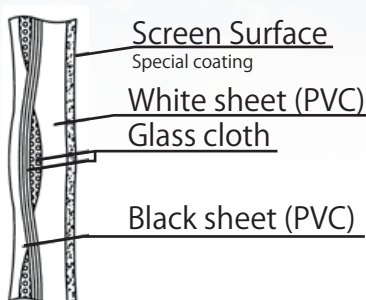

Retroreflective screens with a long history of development since the 1990s.

Taking into consideration color temperature, viewing environment, contents, and resolution (Projector), the flagship retroreflective screen "Ultra Beads III AKIREI" was created more than two years, starting with the study of beads particles.

Features of Material

- A retroreflective type screen (Beads) made by scattering microscopic optical lens glass balls of different sizes and coating them with a unique coating.
- High gain 2.02 (3° GAIN) to project sharp beauty in living room.
- 4K compatible, reproduces every strand of animal hair, every grain of sand, with high-definition expressiveness that even gives a sense of three-dimensionality.
- High color temperature makes it a good match for vibrant images, especially for animation, comedy, action, sports, and video games.
- Technology and quality backed up by a history of development of retroreflective (Beads) material and the brightness we have reached

Material Reflection Characteristics

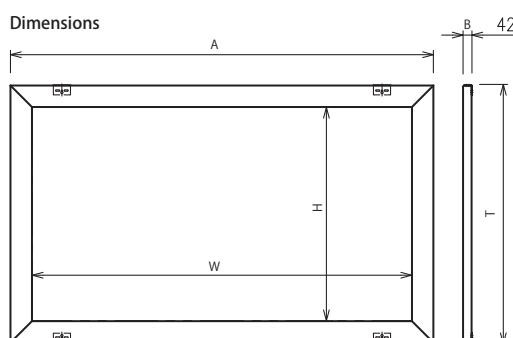

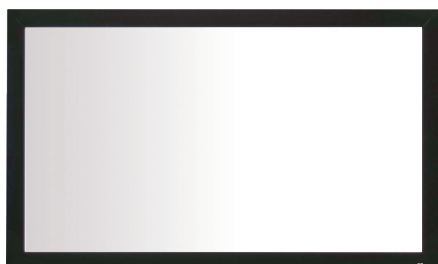

Microphotograph

It is studded with microscopic beads and projects a bright image.

Product Specifications

Fixed frame projection screen PX
The ideal screen to bring out the best of AKIREI
