Origin WF204 of all Pure Mat. A high-quality image produced with the special double weave by the warp and weft yarn.

This is the basis of all kinds of screens. This is the renewed and best qualified fabric for FHD that becomes more familiar to our lives.

- PVC is not used for WF204.
- WF204 produces little moiré but less due to special double weave fabrics of polyester fibers.
- This is an ideal diffusive type with almost no loss of gain even at a viewing angle of 60° or more.
- Since the screen surface is not colored, it brings out more of color effect.

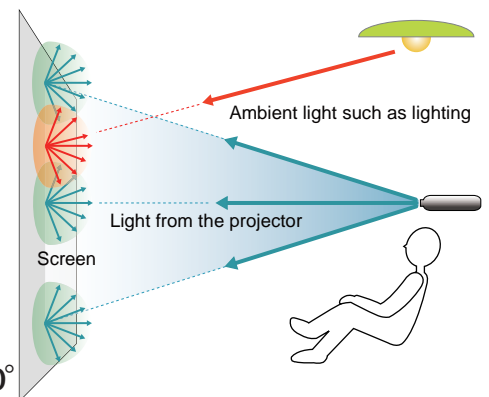

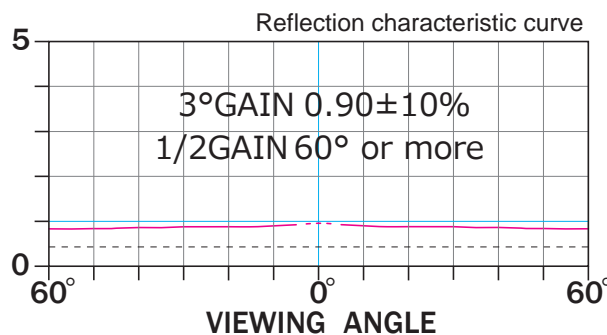

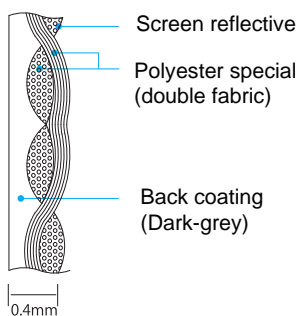

Pure Mat 204

Reflection characteristic image of a diffusive white mat

The WF204 is a diffusion FHD-enabled screen. Diffusive screens reflect image of the same quality in all forward directions, regardless of the viewer's position.

- 3°gain 0.90 ± 10%
- Half gain 60° or more
